

Toxin Post Treatment Instructions (Botox/Dysport)

Fewer facial expressions will be possible after your treatment, this response is usually seen within 7-10 days after injection. It is common for the muscle action along with the associated wrinkles to return in 3 to 4 months but can be shorter or longer.

In a small number of individuals, the injection does not work as satisfactory or for as long as usual.

- You should stay upright and not lie down for 4 hours after injection.
- DO NOT massage the injected sites for at least 4 hours after injection.
- It may be beneficial to exercise the injected muscle for up to 30 minutes after injection.
